WHAT'S THE KEY BENEFIT OF NETPILOT?

It's a total security solution in one box – cutting complexity and saving money.

WHAT DOES THE TERM 'UTM PREMIUM' MEAN?

UTM Premium is our enhanced UTM facilities for NetPilot Vanguard and Globemaster. This pack includes all the security elements available from us, except SSL VPN Plus. It includes Anti-Virus & Spyware from Sophos.

WHAT DOES THE TERM 'UTM STANDARD' MEAN?

UTM Standard is our terminology for its key UTM facilities and is available for all NetPilot models. It is designed for users who don't need all the advanced features offered by UTM Premium.

WHICH UTM PACKS COME BUNDLED WITH NEW NETPILOT PRODUCTS?

NetPilot Vanguard UTM & Globemaster UTM comes with a 12-month's UTM Premium subscription. The NetPilot Guardsman UTM comes with a 25 user UTM Standard subscription.

WHAT IF I WANT NO UTM – I JUST WANT A SMALL OFFICE FIREWALL/VPN UNIT?

All NetPilot models are now available at base units offering standard Firewall / VPN functionality. UTM and single applications (e.g. Anti-Virus) can be purchased separately. SSL VPN Plus can be added to any NetPilot.

WHAT IS SSL VPN PLUS™?

SSL VPN Plus is 3rd Generation SSL technology built into every NetPilot and activated by purchasing the appropriate license key. SSL VPN Plus from NeoAccel provides remote access to the network from any remote computer anywhere in the world. Many other offer SSL VPN but NetPilot is the only UTM appliance available with NeoAccel SSL VPN Plus, meaning much faster (up to 70x faster) more robust and secure connection.

BUT IS SSL VPN PLUS™ TECHNOLOGY SECURE?

NeoAccel SSL VPN Plus technology provides all the advanced security features available in the best SSL solutions and more. Endpoint security checks occur throughout the session and not just at start-up. Combined with Data leakage Prevention (DLP) techniques and support for RSA, Citrix, reverse proxy, RADIUS and AD however you connect (Internet Café, Smartphone or a corporate workstation) your session is secure.

ARE THERE ANY TRADE UP DEALS AVAILABLE?

NetPilot Internet security will always have a promotion to enable new and existing customers who have older equipment to purchase the latest NetPilot model. Please check www.netpilot.com for details of current deals.

ARE THERE 'NUMBER OF USER' LIMITATIONS WITH STANDARD AND PREMIUM UTM PACKS?

Yes. The licensed numbers of users for various products is shown in the chart overleaf. If you need to attach more users, contact us for costs.

MY ISP CHECKS FOR VIRUSES – WHY SHOULD I RUN ANTI-VIRUS ON A NETPILOT?

ISPs cannot check for browser-borne viruses or emails between colleagues on the same site, most don't check for spyware and none for intrusions, or malware from other ISP accounts you may have – whereas NetPilot can!

WHAT ARE SOFTWARE & FIRMWARE UPDATES?

Users who do not subscribe to a UTM pack should subscribe to Updates to obtain the latest system versions.

HOW DOES UTM PREMIUM BLOCK SPYWARE?

Firstly, it uses URL Content Filtering from McAfee/Brightfilter to ensure you don't browse sites that are known to infect PCs. Secondly, NetPilot stores the Sophos created identities of Spyware and blocks them in the same way it blocks viruses.
