

NetPilot Internet Filtering Solutions

Attention Network Managers!

Two great Offers:

Offer1

Top Quality Internet Content Filtering and Web Security for £2/pupil/year*

Schools Internet Filtering and Security package

We can provide hardware, software and support services to provide your school with top quality Content Filtering plus a complete range of UTM security features including Gateway Anti-Virus and Firewalling, all for the equivalent of £2 per user (pupils and staff) per year*.

We believe you will get a much better deal for your school from us – both financially and equally importantly, you will gain greater flexibility by being directly in control of your school's security.

*Assumes school with up to 500 PCs (or other devices) serving 1250 pupils and staff on a 3 year contract.

For an informal discussion, contact our team on: 01275 333608
or email sales@NetPilot.com more details www.netpilot.com/schools

Offer2

For Bloxx customers – an opportunity to upgrade!

We won't leave you high and dry!

Unfortunately for some schools the discontinuation of Bloxx equipment has meant disruption and a requirement to look elsewhere to protect your school. The good news is we can offer a more powerful solution to Bloxx at a more attractive price.

As a special incentive for these schools we can not only make the generous offer explained above – but we will also provide free delivery, support and disposal of your old Bloxx unit.

NetPilot Internet Filtering Solutions

What does NetPilot offer?

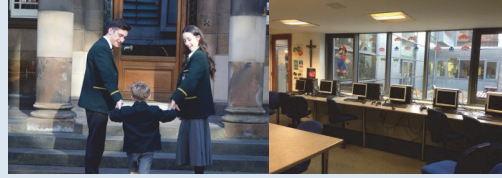

NetPilot offers a complete package of all web security software, hardware and support services tailored to protect UK schools. It combines everything you need to protect your school, its pupils, staff and your network.

Included in our package is a wide range of Unified Threat Management (UTM) protection measures - not just web filtering. We include a state-of-the-art firewall, as well as a full complement of tools to combat against all types of viruses and other threats – from Trojan Horses and Worms, to Malware and Spyware. This means you can be safe in the knowledge that your school network is fully protected all of the time.

- ✓ Powerful internet filtering incorporating the best of list and content filtering solutions
- ✓ The most powerful SSL filtering available
- ✓ Powerful firewall to protect your school from outside attack – even from other schools
- ✓ Web and email protection – gateway scanning: anti-virus, anti-malware, anti-spam
- ✓ Google and Bing SafeSearch enforcement
- ✓ Keyword and phrase filtering
- ✓ Full compatibility with school Active Directory systems enabling policies for individual pupils and staff
- ✓ Automatic software updates – no manual intervention
- ✓ Simpler and cheaper to install and run than overly complex systems from competitors
- ✓ Full audit logs – see who has gone where
- ✓ Solid-state hardware design for highest reliability
- ✓ Full 3 year hardware warranty with next school day replacement should hardware fail
- ✓ Designed to exceed former BECTA filtering specification

Who uses our filtering?

Featured School: St Aloysius College, Glasgow

- More than 11 years of successful use
- Primary and Secondary school deployment
- Using content filtering, firewall and remote access.
- Like reliability and simplicity

“It does a great job with regard to filtering – but it does so much more. I can sleep at night knowing the College is protected”

“We have never seriously considered using anything else – it has never let us down”

James Ewart, Network Manager St Aloysius College Glasgow.

About NetPilot Internet Security

NetPilot Internet Security (NIS) Ltd is a UK company with a twelve year history of supplying leading edge security solutions. It specialises in the UK market and all its products are designed and built in the UK.

NIS has supplied internet filtering and security products into several thousand UK businesses and armed forces establishments, in addition to primary and secondary schools. The recent rapid growth in the number of devices supplied into UK education is based on the quality and the cost-effectiveness of our solution.

NetPilot has been at the heart of internet filtering for all three branches of the armed forces for nearly ten years and is deployed worldwide. The RAF has recently further endorsed the solution by re-equipping with the very latest NetPilot UTM units for its training and education establishments.
