v6.2.11

Release date: Not yet released

New features in this release

1. ARP cache screen. Network > Diagnostics > ARP cache.

Changes/Enhancements in this release

1. Spam filtering engine and rule updates.
2. Option to disable TLS on the SMTP port (25), by logging a support request.
3. The web proxy no longer adds an X-Forwarded-For header. This fixes an issue with Sky TV set top boxes.
4. Serial port console is no longer supported.

Bugs fixed in this release

1. Firewall services screen is blank.
2. Test URL screen does not return a result.
3. OpenVPN with Active Directory authentication enabled occasionally stops authenticating.
4. Captive Portal doesn't apply the correct access rights as defined by the user groups.
5. Captive Portal displays the wrong logo on SohoBlue units.
6. Upgrade re-enables licensed features that are enabled by default but have been disabled by the user.
7. "diald-messages" and "objcap" logs grow excessively large.
8. Upgrade fails to complete if the unit is low on disc space, leaving the unit in an inconsistent state.
